REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Entity-Relationship (ER) Diagramming which is believed to also be known as Chen notation. Is much like object modeling (object oriented) where entities are represented and connections (relationships) drawn among the entities. The invention has an ER diagramming aspect. The closest prior art is the discipline of SSADM. However, as pointed out in Applicant's response of January 5, 2005 beginning on page 13 and ending on page 15 The invention employs a DFD matrix and utilizes an ER source information file. The prior art of record fails to describe the mechanisms of displays and interaction within the displays as argued in the specified pages.

Applicant's arguments against the Scullo reference which visually meets the matrix display fails in a similar manner to describe the mechanisms as claimed by the invention to satisfy the burden of substantial evidence under *In re Zurko*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
